Key Insights & Strategic Recommendations

This section summarises key findings from the analysis and links them directly to supporting visuals for validation.

Key Insights

1. Profitability Imbalance

Despite strong revenue performance, profitability varies significantly across categories, with Grocery operating at a loss and Electronics showing lower than expected margins.

 [View Category Performance](#)

2. Discount Inefficiency

Higher discount levels do not consistently lead to higher profitability, particularly in Electronics, indicating inefficient pricing strategies.

 [View Discount Analysis](#)

3. Delivery Impact on Returns

Slower delivery times are associated with higher return rates, suggesting operational inefficiencies directly affect customer satisfaction.

 [View Delivery Impact](#)

4. Regional Performance Stability

Profit margins remain relatively consistent across regions despite variations in return rates, indicating stable pricing but uneven operational efficiency.

 [View Regional Performance](#)

5. Customer Segment Contribution

Customers aged 55+ contribute the highest share of revenue across categories, highlighting a key high-value segment.

Note: All insights are derived from interactive dashboards and can be validated using the linked visuals across the report pages.

Strategic Recommendations

1. Improve Grocery Profitability

Re-evaluate pricing, supplier costs, and logistics to address persistent negative margins.

2. Optimize Discount Strategy

Implement targeted discount strategies based on category performance to improve margin efficiency.

3. Enhance Delivery Efficiency

Reduce delivery times through logistics optimisation to lower return rates.

4. Focus on High-Value Customers

Develop targeted campaigns for the 55+ segment to maximise revenue.

5. Reduce Returns in Key Categories

Improve product descriptions, quality checks, and customer expectations in high-return segments.

6. Payment-Based Promotion Strategy

Leverage dominant payment methods such as Credit Card and Debit Card to design targeted promotions (e.g., cashback offers or payment-specific discounts) to increase conversion rates and customer retention.

7. Regional Growth Strategy

Prioritise South and North regions for growth and retention strategies, as they contribute the highest share of revenue.
